

We are FRC Global

FRC Global supplies refractories, electrodes, and high temperature combustion systems for the steel and metals industries.

Prior to renaming in 2020, FRC Global was Fedmet Resources Corporation which included the brands Fedmet, Diamond Graphite, and Fedmet-Gastrim.

FRC Global is a second generation family owned company with a 30-year history.

FRC Global has offices, agents, or partners in 20 countries around the world.

What is Changing

We're bringing all our brands under one umbrella.

We are no longer Fedmet, Diamond-Graphite, and Fedmet-Gastrim, we are just FRC.

We are more global than we used to be and have more partners around the world than we ever have. We source the best raw materials we can find, wherever they are globally.

We are implementing new technologies throughout the company to increase innovation, efficiency, and transparency.

Our Products

We serve clients within the iron, steel and non-ferrous industries, and our products include:

- Bricks of All Types**
- Flow Control**
- Stirring Plugs and Equipment**
- EBT and Ladle Sands**
- Ingot Pouring Tile and Hot Tops**
- Graphite Electrodes**
- Heat Transfer Technology**
- Foundry Supplies**

What is Staying the Same

You are still part of our family. You will see the same people and receive the same products and services you expect.

You still have access to our entire team of experts, all the way up to the top. We are available to answer any product or process questions you have.

We are still providing globally sourced and competitively priced products to the high temp industry.
