

MGO Briquette 65

Application: FRC Global's MGO Briquette 65 is a high-quality slagging additive used in steel aggregates for increasing MGO content in a slag.

Product Features: Consistent quality and chemistry for excellent and fast slag formation. Uniform sizing, minimum damage and product degradation during shipping which minimizes fines formation.

FRC Global is a leading supplier of refractories, electrodes, and high temperature combustion systems.

We provide outstanding results for our clients within the iron, steel, and non-ferrous industries. Our company's reputation is built by delivering high quality products made with premium raw materials.

Through the use of vast global resources, all of us at FRC Global are committed to being the value creators and problem solvers for our industry.
